

CARE INSTRUCTIONS FOR UNIFORMS WITH SPECIALTY MATERIALS

WASH WITH CARE!

Your custom made uniform is delicate and needs special care.

Washing Instructions for uniforms with special fabrics and materials:

Our fabric manufacturers highly recommend that you gently **HAND WASH** * inside out in cold water using **MILD LIQUID DETERGENT**. Rinse thoroughly, remove immediately, and **HANG DRY**. We recommend "TIDE FREE" as it is free of dyes and fragrances or "DREFT" LIQUID DETERGENT.

DO NOT leave wet or damp garment in washing machine, sink, or gym bag.

DO NOT Dry Clean.

USE LIQUID DETERGENTS ONLY.

DO NOT USE granular detergents.

DO NOT USE oxygen-based detergents, or detergents containing bleach, hydrogen peroxide, or chlorine.

DO NOT USE fabric softener or detergents with fabric softener.

DO NOT USE BLEACH.

DO NOT Machine Dry.

DO NOT IRON.

Special Notes:

- Please note that perspiration, some deodorants, hairsprays, and alcohol-based aerosols (i.e. glitter sprays) may affect the color properties of the garment.
- Do not leave in gym bag after use. Please hang or wash garment after use.
- Due to the heat application process used in manufacturing the more delicate fabrics, fading or color change or loss of sequins is normal over time and/or after washing.
- We are not responsible for uniforms that are laundered incorrectly or for sequins that fall off.

*If machine wash **MUST** be used, we suggest that you wash the garment inside out separately in a **FULL** tub of **COLD** water on the hand-wash cycle, using the instructions above. We strongly recommend that you **DO NOT MACHINE WASH**.
